

30th April 2019

PRESS RELEASE

10th International Multihull Show - La Grande Motte (Hérault) - France

A great anniversary edition!

The International Multihull Show took advantage of some windy weather to blow out ten candles to celebrate its anniversary.

Founded in 2010 in Lorient, this event dedicated to cruising multihulls, with sails or engines, developed in the heart of the Mediterranean in La Grande Motte (Hérault - France), where it has fully matured.

This latest edition was once again crowned with success and boat builders widely expressed their satisfaction after seeing their order books fill up. This year will be remembered for the large number of visitors from abroad from all sorts of places, who accounted for a large proportion of the sales that were signed here.

We are repeating ourselves, but the multihull industry is working full out and the success of this show is a consequence of that. With more than sixty multihulls on show, a new record was set.

The diversity and quantity of catamarans and trimarans displayed here confirm the enthusiasm generated by this new way of sailing; the living quarters, the comfort of sailing and the small draught of these boats are the major advantages of this type of vessel and boating fans have understood that.

The whole of the sector is working with this development and all the major equipment makers, charter firms, sail-makers, marine electronics suppliers and insurance companies among others attended this event for the enjoyment of the 14,000 visitors to the show.

The dates for 2020 have been set for five days given over entirely to multihulls: **from 15th to 19th April.**
