With April around the corner, the Mediterranean gem of La Grande-Motte is buzzing with anticipation for this year's [International Multihull Show](#). From 12 to 16 April, this one-of-a-kind event will host an unrivalled showcase of 70 pleasure multihulls – the most comprehensive display of unit sizes and ranges, engine versions and manufacturers available in one setting. Marine experts and enthusiasts of all stripes will be gathering from near and far to celebrate multihulls in all their glory.

The ultimate event dedicated to multihulls

Launched in 2010, the International Multihull Show is now known internationally for its exclusive focus on catamarans and trimarans, with sail or engine. Every April, the iconic event welcomes visitors from near and far. This year, 15,000 visitors are expected to arrive at the annual event, over half of them from outside of France.

Upon arrival, visitors will be greeted by the white tents of the exhibitor village, located right by the port. Here, all attendees get to explore all things multihull-related: equipment manufacturers, rental companies, sailmakers, transporters, insurance companies, banks... and of course, the Boats Group will be there too, so come and say hi! We will be available to answer all your questions, provide support for your multihull-related needs and make your multihull dreams a reality.

This year, the village welcomes 14 new exhibitors from around the world, ranging from fittings and equipment manufacturers to hybrid and eco-responsible boats and batteries. Alongside them, returning industry and specialised partners will be presenting time-honoured favourites as well as the latest innovations in safety, sail technology and composite materials.

Newest study findings in the multihull market

As we count down the days to the show, we are getting prepared to receive you. Whether you're a seasoned multihull owner or just beginning your search – we'd love to meet you. Come for a chat at our stall in the exhibitor village, or reach out to us at intl.customers@boats.com.

If you haven't secured yours already, you can [buy tickets for the 2023 International Multihull Show here](#).
